

Biomass pre-game concept map. Try to fill in and connect concepts with explanations, terms, or sketches to create relationships that make sense. You can draw new linker lines to connect concepts and use words in the middle of the linker line to explain the connection. Concepts can have many connections, in fact the more you connect the better learning will occur. Have fun, do your best, but as we move through the learning sequence know that you will be much better able to make connections.
